Journal of the Japan Institute of Energy

Volume 91 Number 1 January 2012

CONTENTS

Foreword

S. MURAKI ····· (1)

Special Articles: Post 3.11 — Japan's Energy Policy and Technology Trend —

(Reviews)

The Challenge of Optimal Energy Mix
S. HORI ····· (2)

Solar Photovoltaics: Current Status and Outlook
M. KONDO ····· (10)

Future Prospects of Nuclear Power Utilization
K. KUDO ····· (16)

A Consideration on Coal Energy in the Future
J. HAYASHI ····· (23)

Current Status and Future Perspectives of Fuel Cells and Related Hydrogen Technologies
K. SASAKI ····· (29)

Original Paper

CaO Catalysts Prepared from a Variety of Limestone-deriving Industrial Materials for Transesterification of Soybean Oil with Methanol
H. MORIYASU, K. KOSHI, M. KOUZU ····· (34)

Formation Characteristics of High-density and High-hardness New Briquette Based on Herby Biomass
S. MIZUNO, T. IDA, M. FUCHIHATA, K. NAMBA, A. KAKOSAKA, O. FUJITA ····· (41)

Examination of Coking Behavior of Coking Coal and Binder through Characterization Utilizing High Temperature Solvent Fractionation
R. ASHIDA, A. HAGIMOTO, K. MIURA, N. OKUYAMA, M. HAMAGUCHI, T. SHISHIDO, N. KOMATSU ····· (48)

Technical Paper

Value Addition and Prospects of Bioethanol Production from Sugarcane in the Philippines
M. M. ELAURIA, J. C. ELAURIA ····· (56)

Lecture Note

Energy Conversion (3-7) : Polymer Electrolyte Fuel Cell
T. IOROI ····· (61)

Opinion

The Great East Japan Earthquake Towards a 21st Century Type of Energy Policy
T. IIDA ····· (67)

Introduction of Research Group (Takuma Co., Ltd.) ····· (72)

Entropy ····· (75)

JIE Calendar ····· (76)

Bulletin Board ····· (76)

From the Editors ····· (78)
